ACCOUNTING

ACCT 1001EL 12

Understanding and Using Financial Information

This course will provide students with an overview of the role of financial information in society and in their own lives. It will increase awareness of ethical and public policy issues. Content includes an exploration of the uses of financial information in decision making from the perspectives of managers, owners, creditors, governments, and other users. This is followed by an examination, in more detail, of issues involving income, cash flow, and economic resources from either management or owners' and creditors' points of view. The focus is "learning to learn" based on an interactive environment as well as individual efforts. Integral to this approach is the extensive use of real financial statement data. Throughout the course students will use excerpts from annual reports of corporations, reprinted as they originally appeared. Students will have ample opportunity to develop analytical and problem-solving skills as well as communication skills. Cross-listed with ADMN 1126. Students cannot retain credit for both COMM 1106 and ACCT 1001. (3 cr)

COMMUNICATION STUDIES

For further information on Communication Studies courses, contact Huntington University at dnoeldetilly@huntingtonu.ca or 705-673-4126, ext. 201.

COST 2446EL 12

Dynamics of Interpersonal Communication, Part I

Huntington University

This course considers the nature and meaning of interpersonal communication as dialogue. An examination is made of communication skills such as self-awareness, self-disclosure, listening and responding. Students will explore the meaning of four levels of communication: exchange, interchange, intimacy and communion. The virtue of civility seen as an ethical organizational tool will be explored as the basis for enhancing all forms of interpersonal communication. Cross-listed with RLST 2446. Students who have taken COST/RLST 2445 cannot take COST 2446. (3 cr)

EDUC 3006EL 12**Educational Psychology/Special Education**

B.Ed. students will study the impact of significant psychological theories on teaching and learning in the classroom. They will investigate topics such as human development, cognition, learning theory, motivation and psychological and educational assessment. The special education component will enable teacher candidates to develop competence and confidence in dealing with pupils in the regular classroom who have special needs. To this end, they will examine special education services in Ontario, types of exceptionalities, the process used for identifying and placing students with exceptionalities in programs (IPRC) and the preparation of individual education plans (IEPs). They will become aware of the Ontario Ministry of Education policy requiring boards of education to set up Special Education Advisory Committees and to file board plans annually delineating the special education program and special education services available to its exceptional pupils. They will consider ways of providing an inclusive classroom environment and investigate classroom management strategies that have proven helpful with special needs students. They will examine Ontario College of Teachers' documents on Standards of Practice for the Teaching Profession and Ethical Standards for the Teaching Profession to ascertain professional expectations for the equitable and respectful treatment of all students. GERO 3216EL 12

The Aging Body *Huntington University*

This course presents a broad biological perspective on aging of the human body from a cellular to whole body view. It directly correlates the impact of aging to changes associated with tissues, cells, and sub-cellular components. These changes are correlated to clinical disease and mental illness as presented in older adults. By the end of the course, students have developed a deeper understanding of the biology that defines all that is seen and experienced with aging. (3 cr)

HUMAN KINETICS

PHED 2526EL 12

Introduction to Ergonomics

This course is designed to give the student a background in the theory and practice of ergonomics. Students will learn about the sciences that contribute to ergonomics and how they are applied in various situations to determine human capabilities and limitations. Students will also gain an understanding of the application of ergonomic principles in several areas including workspace design, musculoskeletal injury prevention, control, display design, and computer ergonomics. This course is open only to students in the School of Human Kinetics, but not to students registered in the B.Sc. Kinesiology Program. Students may not retain credit for both INTE 2526 and PHED 2526. PHIL 2217EL 10

Environmental Ethics

University of Sudbury

The environment is clearly of concern to our modern day society. Efforts to promote "green" alternatives are rooted in the realization that the technological advances and increased urbanization has created a number of concerns that must be addressed. Environmental concerns extend beyond science, however, and they challenge our understanding of what we think is right and wrong, good or bad. This course is an introduction to the ethical problems arising in the context of human relationships to nature and to non-human living things, considered in terms of both general moral theory and policy formation. Topics include moral standing, animal rights, obligations to future generations, pollution, hazardous materials, and the depletion of natural resources. (3 cr)

PHIL 2345EL 10

Bioethics: Human Life Issues

University of Sudbury

This course will examine current controversies about the benefits and dangers to human life arising from recent developments in the biomedical sciences. Special attention will be given to issues in the reproductive technologies, genetics, the care of the terminally ill, AIDS, research with human subjects, and to questions of abortion and euthanasia. Comprehensive understanding of the issues at stake and ability to evaluate the positions taken in these controversies define the aims of the course. Students may not retain credit for both RLST 2345 and PHIL 2345. (6 cr)

Contemporary Moral Issues

University of Sudbury

In this course, we will engage in philosophical reflection on a selected number of current moral problems such as censorship and pornography, love and the family, sexual harassment, hate crimes, racism, the legitimacy of violence, civil disobedience, capital punishment, suicide, gun control, and resource allocation. Our investigation of these issues will provide the opportunity to examine the viability of comprehensive moral frameworks. (6 cr)

PHYS 2606EL 10

Biophysics of Fluids

(Internet access is required.)

This course begins with an introduction to random motions of molecules leading to a discussion of the physics of gas exchange in the processes of respiration. The response of the body to changes of external pressure will be studied from a physical point of view. The transport of pollutants and their physical effects on the body will be discussed. The course also examines various aspects of static pressure in the human body and the physics of blood circulation including laminar, turbulent and viscous flows. Other topics such as capillarity, surface tension, and the role of surfactant will be discussed. Prerequisites: PHYS 1006/1007, or PHYS 1206/1207, or PHYS 1211/1212, or equivalent. (3 cr)

Women, Religion and Spirituality

Thorneloe University

This course is an exploration of the role and perception of women primarily in the western religious tradition from ancient times to the present. The course examines the influence of religious tradition upon the status of women in various historical periods. The modern meeting of Christianity and feminism is then examined through an indepth discussion of such current issues as birth control, abortion, violence against women and the ordination of women. The

course also studies personal narratives which reflect the influence of religion on the current experience of women in society. RLST 2245 may be counted as 6 credits towards a concentration in Women's Studies. Students cannot retain credit for both RLST 2395 and RLST 2245. (6 cr)
